

California OES Weather Threat Briefing

Tuesday, June 1, 2021
9:00 AM PDT

Day 1 (Tuesday): Hot temperatures are expected statewide again today, with the most significant impacts possible across Inland Region.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

06/01/21 - 06/07/21

Tuesday - Monday

- Generally dry conditions are expected through the week, though isolated showers and thunderstorms are possible in the afternoons across the mountains of Inland Region, especially Wednesday and Thursday
- Hot temperatures will continue over much of the state through the middle of the week, with widespread 90s or 100+ degree readings expected across the southern deserts as well as much of the Central Valley. Moderate to locally high heat risk is expected.
- Locally gusty winds of 25-40 mph and very dry conditions will produce elevated fire weather conditions each day, especially along mountain slopes
 - These winds will likely be strongest across the southern California mountains and deserts
 - This also includes some breezy offshore winds expected in northern coastal areas and surrounding mountains through Tuesday
